

Paid Media Readiness Report

TARGET

Beyondthesugar

<https://beyondthesugar.com/>

Executive summary

56

C · READINESS

Mid-range readiness. A few fixable gaps are likely costing real revenue.

BIGGEST OPPORTUNITY

Channel coverage is the gap — Meta + Google together compound. Running only one leaves money on the table.

Scorecard

MEASUREMENT

B-

65

/100

Foundational tracking present but missing pieces — likely under-attributing revenue.

STRATEGY / CHANNEL PRESENCE

F

30

/100

ESTIMATED

Little to no observable paid activity. Massive untapped channel — start with Meta + Google.

LANDING PAGES

B

75

/100

ESTIMATED

Workable but with friction. Speed + clarity wins are on the table.

CREATIVE

C

50

/100

ESTIMATED

Creative volume + variety could not be measured. Estimated mid-range.

MEASUREMENT · 65/100

Foundational tracking present but missing pieces — likely under-attributing revenue.

- Meta Pixel detected
- GA4 detected
- Google Tag Manager in use
- First-party / server-side tagging hint

STRATEGY / CHANNEL PRESENCE · 30/100

ESTIMATED

Little to no observable paid activity. Massive untapped channel — start with Meta + Google.

- Schema.org: BreadcrumbList, ContactPoint, Country, EntryPoint
- 15 discoverable internal pages
- Lead-capture form present
- Clear CTA present (e.g. "Contact Us")
- No Facebook Page resolved from the site

LANDING PAGES · 75/100

ESTIMATED

Workable but with friction. Speed + clarity wins are on the table.

- Mobile viewport set
- Title is 66 chars (target 30-65)
- PageSpeed Insights unavailable — scored on on-page proxies only

CREATIVE · 50/100

ESTIMATED

Creative volume + variety could not be measured. Estimated mid-range.

- META_ACCESS_TOKEN not configured
- Creative pillar capped at 50 in absence of Ad Library data

Prioritized fixes

Ranked by leverage: which fix unlocks the most revenue per hour of effort.

Add Conversions API alongside Meta Pixel

#1

iOS + browser tracking loss costs roughly 20-30% of attributed conversions. CAPI recovers them server-side.

Add a Google Ads conversion tag (or import GA4 events)

#2

Even if you're not running Google Ads yet, the tag lets you bid on intent the day you start.

Rewrite the page title (current length 66 chars)

#3

Title under 30 chars wastes SERP real estate; over 65 gets truncated. Both cost organic and paid CTR.

Want the full read?

These are surface-level signals from public data. ROI Labs delivers a full audit — including account-level data, account structure, creative diagnostics, and a 90-day plan — within 24 hours.

support@roilabs.in · roilabs.in/#contact

Methodology: ROI Labs Auditor scores observable public signals (tracking stack, PageSpeed, Meta Ad Library, on-page strategy). It cannot measure ad spend, ROAS, or internal analytics. Signals we cannot directly observe are labelled "Estimated" or "Not available."
