

Paid Media Readiness Report

TARGET

Shyle

<https://www.shyle.in/>

Executive summary

64

B- · READINESS

Mid-range readiness. A few fixable gaps are likely costing real revenue.

BIGGEST OPPORTUNITY

Channel coverage is the gap — Meta + Google together compound. Running only one leaves money on the table.

Scorecard

MEASUREMENT

B

75

 /100

Foundational tracking present but missing pieces — likely under-attributing revenue.

STRATEGY / CHANNEL PRESENCE

C

55

 /100

ESTIMATED

Light paid activity, or unable to confirm. Big upside in proper channel coverage.

LANDING PAGES

B

70

 /100

ESTIMATED

Workable but with friction. Speed + clarity wins are on the table.

CREATIVE

C

50

 /100

ESTIMATED

Creative volume + variety could not be measured. Estimated mid-range.

MEASUREMENT · 75/100

Foundational tracking present but missing pieces — likely under-attributing revenue.

- Meta Pixel detected
- GA4 detected
- Google Ads conversion tag detected
- First-party / server-side tagging hint
- Consent mode / CMP present
- No Tag Manager — manual tag governance is fragile

STRATEGY / CHANNEL PRESENCE · 55/100 ESTIMATED

Light paid activity, or unable to confirm. Big upside in proper channel coverage.

- Facebook Page found (shylebyastha) — Ad Library check unavailable
- Google Ads conversion tag on-page (running Google Ads)
- Schema.org: Answer, FAQPage, Question
- 165 discoverable internal pages
- Lead-capture form present
- Clear CTA present (e.g. "Add to cart")

LANDING PAGES · 70/100 ESTIMATED

Workable but with friction. Speed + clarity wins are on the table.

- Mobile viewport set
- Title length OK (52 chars)
- Description is 219 chars (target 80-180)
- PageSpeed Insights unavailable — scored on on-page proxies only

CREATIVE · 50/100 ESTIMATED

Creative volume + variety could not be measured. Estimated mid-range.

- META_ACCESS_TOKEN not configured

Prioritized fixes

Ranked by leverage: which fix unlocks the most revenue per hour of effort.

Add Conversions API alongside Meta Pixel

#1

iOS + browser tracking loss costs roughly 20-30% of attributed conversions. CAPI recovers them server-side.

Adopt Google Tag Manager

#2

Hard-coded tags rot. GTM gives one place to audit, version, and consent-gate every pixel.

Want the full read?

These are surface-level signals from public data. ROI Labs delivers a full audit — including account-level data, account structure, creative diagnostics, and a 90-day plan — within 24 hours.

support@roilabs.in · roilabs.in/#contact

Methodology: ROI Labs Auditor scores observable public signals (tracking stack, PageSpeed, Meta Ad Library, on-page strategy). It cannot measure ad spend, ROAS, or internal analytics. Signals we cannot directly observe are labelled "Estimated" or "Not available."
