

Paid Media Readiness Report

TARGET

Threadfactory

<https://threadfactory.in/>

Executive summary

45

D · READINESS

Significant gaps. Don't scale spend before closing them — money will leak.

BIGGEST OPPORTUNITY

Fix measurement first — without Pixel + CAPI + GA4, ad platforms can't optimise to revenue.

Scorecard

MEASUREMENT

F

20

 /100

Minimal or no tracking. You are flying blind — this is the single biggest fix.

STRATEGY / CHANNEL PRESENCE

F

20

 /100

ESTIMATED

Little to no observable paid activity. Massive untapped channel — start with Meta + Google.

LANDING PAGES

A

95

 /100

ESTIMATED

Fast, ad-traffic-ready landing experience.

CREATIVE

C

50

 /100

ESTIMATED

Creative volume + variety could not be measured. Estimated mid-range.

MEASUREMENT · 20/100

Minimal or no tracking. You are flying blind — this is the single biggest fix.

- GA4 detected
- No Meta Pixel detected
- No Tag Manager — manual tag governance is fragile

STRATEGY / CHANNEL PRESENCE · 20/100 ESTIMATED

Little to no observable paid activity. Massive untapped channel — start with Meta + Google.

- 13 discoverable internal pages
- Clear CTA present (e.g. "Contact Us")
- No Facebook Page resolved from the site
- No form on the page — lead capture missing

LANDING PAGES · 95/100 ESTIMATED

Fast, ad-traffic-ready landing experience.

- Mobile viewport set
- Title length OK (64 chars)
- PageSpeed Insights unavailable — scored on on-page proxies only

CREATIVE · 50/100 ESTIMATED

Creative volume + variety could not be measured. Estimated mid-range.

- META_ACCESS_TOKEN not configured
- Creative pillar capped at 50 in absence of Ad Library data

Prioritized fixes

Ranked by leverage: which fix unlocks the most revenue per hour of effort.

Install Meta Pixel + Conversions API

#1

Without Pixel + CAPI, Meta's optimisation runs blind. Expect ~30-50% lower attributed ROAS and an unstable scaling curve.

Add a Google Ads conversion tag (or import GA4 events)

#2

Even if you're not running Google Ads yet, the tag lets you bid on intent the day you start.

Adopt Google Tag Manager

#3

Hard-coded tags rot. GTM gives one place to audit, version, and consent-gate every pixel.

Want the full read?

These are surface-level signals from public data. ROI Labs delivers a full audit — including account-level data, account structure, creative diagnostics, and a 90-day plan — within 24 hours.

support@roilabs.in · roilabs.in/#contact

Methodology: ROI Labs Auditor scores observable public signals (tracking stack, PageSpeed, Meta Ad Library, on-page strategy). It cannot measure ad spend, ROAS, or internal analytics. Signals we cannot directly observe are labelled "Estimated" or "Not available."
