PAID MEDIA READINESS SCORE

Partial — leaving revenue on the table

Audited across Meta Ads, Google Ads, tracking & landing pages

/ 100

BUSINESS PROFILE DETECTED

COMPANY

Lumio

WHAT THEY SELL

Direct-to-consumer modern lighting and home décor, sold via Shopify and shipping across the US.

PRIMARY BUYER

Design-conscious homeowners and renters, 28–45, in US metros — predominantly shopping on mobile.

THE BUSINESS PROBLEM

Rising CAC and flat ROAS: scaling Meta spend is no longer translating into profitable revenue.

AUDIT CHECKS — 24 SIGNALS VS COMPETITORS

● in place ○ missing / weak

AUDIT CHECK	LUMIO	GLOWHAUS	NESTWELL	AURALIS
STRATEGY	Lumio: 3/6 passed			
Full-funnel structure (prospecting → retargeting)	●	●	●	○
Audience segmentation by intent, not one broad set	●	●	○	○
Budget allocated by margin, not blanket ROAS	○	●	○	○
Advantage+ Shopping campaign live	○	●	●	○
Performance Max properly structured + excluded	○	●	○	●
Negative-keyword discipline on Search	●	●	●	○
CREATIVE	Lumio: 2/6 passed			
5+ active ad creatives per campaign	●	●	●	●
Reels-native / vertical video creative	●	●	●	○
UGC-style creative in rotation	○	●	○	○
Testing at the asset level, not campaign level	○	●	○	○
Catalog / dynamic product ads live	○	●	●	○

Audit Check	Lumio	Glowhaus	Nestwell	Auralis
Landing Pages	Lumio: 4/6 passed			
Dedicated landing pages for ad traffic				
Mobile LCP under 2.5s				
Layout stability (CLS under 0.1)				
Single clear CTA above the fold				
A/B testing in place on key pages				
Fast, low-friction checkout				
Measurement	Lumio: 3/6 passed			
Meta Pixel installed				
Conversions API (CAPI) configured				
GA4 installed				
Google Tag Manager present				
Server-side tracking live				
Purchase value / revenue passed correctly				

INSIGHTS

STRONGEST PILLAR

Landing Pages

67% — your pages convert; the leak is upstream in spend and signal.

BIGGEST GAP

Creative

33% — Glowhaus ships ~5× your creative volume and tests at the asset level. You don't.

RECOMMENDATION

Fix measurement first — stand up **CAPI + server-side tracking** so Meta stops optimising on partial data and your true ROAS appears. Then rebuild creative to **weekly asset-level testing**. Together these reclaim the budget you're currently wasting.

SETUP & TRACKING

✓ Meta Pixel installed	✗ Conversions API (CAPI)
✓ GA4 installed	✗ Server-side tracking
✓ Google Tag Manager	✗ Purchase value tracking verified
✓ Consent mode configured	✗ Product catalog feed connected

FIXES TO PRIORITISE

HIGH IMPACT (8)

Deploy Meta Conversions API (CAPI)

Impact: High · Effort: Medium

Without CAPI, iOS signal loss leaves Meta optimising on partial data and inflates reported ROAS — the single biggest source of wasted spend in this account.

Add server-side tracking (GTM Server)

Impact: High · Effort: Medium

Recovers conversions lost to ad blockers and ITP so the algorithm bids on real buyers, not a fraction of them.

Verify purchase value is passed correctly

Impact: High · Effort: Low

If value isn't sent, value-based bidding can't work — you're leaving Advantage+ and target-ROAS performance on the table.

Launch Advantage+ Shopping

Impact: High · Effort: Low

Your top competitor runs it; it's the highest-leverage Meta prospecting format for a DTC catalog like yours.

Move to weekly asset-level creative testing

Impact: High · Effort: Medium

Creative is the #1 lever on Meta. Testing whole campaigns (as you do now) burns budget; test individual assets.

Add UGC-style creative to rotation

Impact: High · Effort: Medium

UGC consistently outperforms polished studio ads for DTC — you currently run none.

Restructure Performance Max with asset-group discipline

Impact: High · Effort: Medium

Your PMax is a black box spending on brand and junk placements; structure + exclusions reclaim that budget.

Connect the product catalog feed

Impact: High · Effort: Low

Unlocks dynamic retargeting and prospecting across your full SKU range.

MEDIUM IMPACT (8)

Fix mobile LCP (under 2.5s)

Impact: Medium · Effort: Medium

Most of your ad traffic is mobile; slow load quietly kills conversion on clicks you've already paid for.

Add full-funnel retargeting tiers

Impact: Medium · Effort: Low

Capture viewers, add-to-carts and visitors you're currently letting cool off.

Reallocate budget by margin

Impact: Medium · Effort: Low

Shift spend toward high-margin SKUs instead of blanket ROAS targets that hide unprofitable winners.

Stand up dedicated ad landing pages + A/B tests

Impact: Medium · Effort: Medium

Sending paid traffic to generic pages caps conversion; test variants built for ad intent.

Extend Reels-native vertical creative

Impact: Medium · Effort: Low

You have some — scale it. Reels placements are the cheapest DTC impressions right now.

Layer in YouTube / Demand Gen

Impact: Medium · Effort: Medium

Cheap incremental reach once Search and Meta are stable and measured properly.

Run negative-keyword sweeps on Search

Impact: Medium · Effort: Low

Stop paying for irrelevant queries draining the Search budget.

Switch to weekly revenue-based reporting

Impact: Medium · Effort: Low

Report contribution margin and blended ROAS, not platform-reported ROAS that double-counts.

QUICK WINS (8)

Exclude existing customers from prospecting

Impact: Low · Effort: Low

Stop paying to re-acquire people who already bought.

Add brand-name negatives to Performance Max

Impact: Low · Effort: Low

Prevents PMax from claiming credit for cheap branded traffic.

Configure Consent Mode v2 correctly

Impact: Low · Effort: Low

Protects conversion modelling and keeps data flowing under privacy rules.

Enable dynamic / automatic placements

Impact: Low · Effort: Low

Let Meta find the cheapest placements instead of pinning to feed only.

Enforce UTM discipline across all ads

Impact: Low · Effort: Low

Clean attribution in GA4 so the numbers are trustworthy.

Refresh copy on top-spending ads

Impact: Low · Effort: Low

Fatigued copy raises CPMs; a refresh is the cheapest CTR win available.

Cap frequency on retargeting audiences

Impact: Low · Effort: Low

Stop over-serving the same users and wasting impressions.

Pause zero-conversion ad sets older than 14 days

Impact: Low · Effort: Low

Immediate budget recovery from proven losers.
